

The NabhRakshak Tapo by Pisarv Technologies is a versatile and reliable surveillance tool designed and developed in India for security, monitoring, and training applications. Built with a rugged structure, it offers real-time video streaming capabilities and supports both thermal and normal imaging, making it ideal for rapid situational assessment and response. Its advanced safety features and user-friendly design ensure dependable performance, even in challenging conditions.

Technical Data

Type

Quadcopter

Max Payload

250 gm

Weight

1.5 Kg

Camera system

2K QHD with 4X Zoom
Thermal 384 X 288 Resolution

Endurance

25 Mins

Wind-Resistance

10 m/s

Gimbal

3 Axes Gimbal

Flying Speed

20 m/s

Max Tested Altitude

500 Meters

Range

4-5 KMs

Dimensions

22x27x18 cm

Purpose

Surveillance, patrol, logistics.
